Contents of Volume 53

Volume 53, Number 1, July 2, 1973

AUTHOR INDEX, Volume 53, Number 1	ii
MANORANJAN SINGH, BRIGITTE BÖTTGER, CAROLYN STEWART, GEORGE C. BROOKS, and PAUL A. SREERE. S-Acetyl Phosphopantetheine: Deacetyl Citrate Lyase S-Acetyl Transferase from <i>Klebsiella aerogenes</i>	1
T. A. READER, M. PARISI, and E. DE ROBERTIS. Reactivity to Acetylcholine Developed by Artificial Membranes Containing a Protein from <i>Electrophorus electricus</i> : The Effect of Uranyl Ions	10
GEORGE P. KREISHMAN, DAN E. ROBERTSON, and CHIEN HO. PMR Studies of the Substrate Induced Conformational Change of Glutamine Binding Protein from <i>E. coli</i>	18
H. W. SNYDER and T. SREEVALSAN. Proteins Specified by Sindbis Virus in Chick Embryo Fibroblast Cells	24
J. MARTINEZ-MEDELIN and H. M. SCHULMAN. The Preparation, Properties, and Metabolism of ¹⁴ C-Bicarbonate-Labelled Transferrin	32
THOMAS F. LINSSEN-MAYER, ROBERT L. TRELSTAD, and JEROME GROSS. The Collagen of Chick Embryonic Notochord	39
MARGARET J. ADAMS, GEOFFREY C. FORD, ANDERS LILJAS, and MICHAEL G. ROSSMANN. Atomic Coordinates for Dogfish M ₄ Apo-Lactate Dehydrogenase	46
GENE R. WILLIAMS and J. A. MASER. Plant Ribosome-Bound Proteins: A Fraction from Leaves That Dissociates Bean Ribosomes	52
JAN-I TU and DONALD J. GRAVES. Inhibition of the Phosphorylase Kinase Catalyzed Reaction by Glucose-6-P	59
ELMON L. COE and LUNG-HSIUNG HSU. Acyl Coenzyme A Inhibition of <i>Leuconostoc mesenteroides</i> Glucose-6-Phosphate Dehydrogenase: A Comparison of the TPN and DPN Linked Reactions	66
J. A. FOSTER, E. BRUENGER, C. L. HU, K. ALBERTSON and C. FRANZBLAU. A New, Improved Technique for Automated Sequencing of Nonpolar Peptides	70
FRANCES BROWN, MICHAEL L. FREEDMAN, and WALTER TROLL. Sensitive Fluorescent Determination of Trypsin-Like Proteases	75
HIROCHIKA KOMAI, DOUGLAS R. HUNTER, and YOHEI TAKAHASHI. Effect of Lysolecithin Treatment on the Structure and Functions of the Mitochondrial Inner Membrane	82
P. I. SCHRIER, J. A. MAASSEN, and W. MÖLLER. Involvement of 50S Ribosomal Proteins L6 and L10 in the Ribosome Dependent GTPase Activity of Elongation Factor G	90
MAARTEN J. CHRISPEELS. Mechanism of Osmotic Regulation of Hydrolase Synthesis in Aleurone Cells of Barley: Inhibition of Protein Synthesis	99
R. C. JOHNSON and S. N. SHAH. Evidence for the Participation of Two Soluble Noncatalytic Proteins in Hepatic Microsomal Cholesterol Synthesis	105
NATHAN N. ARONSON, JR., LYDIA Y. TAN, and BARRY P. PETERS. Galactosyl Transferase—The Liver Plasma Membrane Binding-Site for Asialo-Glycoproteins	112
THEODORE W. MUNNS and PHILIP A. KATZMAN. The Methylation of tRNA in KB Cells after Treatment with Actinomycin D	119
TSUKASA NISHIKIDO and HISAKO TAKANASHI. Glycine Activation of PEP Carboxylase from Monocotyledonous C ₄ Plants	126
W. W. BROMER, M. E. BOUCHER, and J. M. PATTERSON. Glucagon Structure and Function. II. Increased Activity of Iodoglucagon	134
F. WONG-STAAAL, J. MENDELSON, and M. GOULIAN. Ribonucleotides in Closed Circular Mitochondrial DNA from HeLa Cells	140
MORTON P. PRINTZ and DAVID LEE MILLER. Evidence for Conformational Changes in Elongation Factor Tu Induced by GTP and GDP	149
JOHN LEE and CHARLES L. MURPHY. Bacterial Bioluminescence: Absorption and Fluorescence Characteristics and Composition of Reaction Products of Reduced Flavin Mononucleotide with Luciferase and Oxygen	157
DANIEL P. GILBOE and F. Q. NUTTALL. The Regulation of Liver Glycogen Synthetase D Phosphatase by ATP and Glucose	164
R. K. BHATTACHARYA and M. O. SCHULTZE. Modification of Polynucleotides by a Fragment Produced by Enzymatic Cleavage of S-(1,2-Dichlorovinyl)-L-Cysteine	172

HARRY N. ANTONIADES, JAMES D. SIMON, and DIMITRI STATHAKOS. Conversion of Exogenous Insulin into High Molecular Weight Forms <i>in Vivo</i>	182
DEAN B. COWIE, PAOLO TRUFFA-BACHI, JEAN-MARC COSTREJEAN, MARIE-CLAIRE PY, and GEORGES N. COHEN. A Preliminary Immunochemical Study of <i>E. coli</i> Aspartokinase I-Homoserine Dehydrogenase I	188
GARY F. GERARD, CORRADO GURGO, DUANE P. GRANDGENETT, and MAURICE GREEN. Rifamycin Derivatives: Specific Inhibitors of Nucleic Acid Polymerases	194
JUDITH SAFFRAN, BONNIE K. LOESER, BERNADETTE M. HAAS, and HOMER E. STAVELY. Binding of Progesterone by Rat Uterus <i>in Vitro</i>	202
B. C. STARCHER and D. W. URRY. Elastin Coacervate as a Matrix for Calcification	210
MILOSLAV TRÁVNÍČEK and JOSEF ŘÍMAN. Subunits of Oncornavirus High-Molecular-Weight RNA. I. Stepwise Conversion of 60S AMV (Avian Myeloblastosis Virus) RNA to Subunits	217
SABERA RUZDIJIC, GEORGI MILCHEV, NEVENKA BAJKOVIC, and VLADIMIR GLISIN. Some Properties of the 24S Particle Isolated from the Cytoplasm of Sea Urchin Eggs	224
TOMOKO OHNISHI, DARYL B. WINTER, JOYCE LIM, and TSOO E. KING. Low Temperature Electron Paramagnetic Resonance Studies on Two Iron-Sulfur Centers in Cardiac Succinate Dehydrogenase	231
RUTH S. ZUKIN, DONALD P. HOLLIS, and GEORGE A. GRAY. Phosphorus-31 Relaxation Rate Studies of Mn^{2+} -Alkaline Phosphatase	238
ROXANNE DESLAURIERS, RODERICH WALTER, and IAN C. P. SMITH. ^{13}C Nuclear Magnetic Resonance Studies of the Conformation of the X-Pro Bond in the Oligopeptide Hormones, Thyrotropin-Releasing Hormone, Luteinizing Hormone-Releasing Factor, Angiotensin and Melanocyte-Stimulating Hormone Release-Inhibiting Factor	244
PINAR T. OZAND, J. TYSON TILDON, RAUL A. WAPNIR, and MARVIN CORNBLATH. Alanine Formation by Rat Muscle Homogenate	251
TERRY A. KRULWICH, MARK E. SOBEL, and ELLEN B. WOLFSON. Alternate Pathways of D-Fructose Transport and Metabolism in <i>Arthrobacter pyridinolis</i>	258
JOSÉF BERUTER, GARY K. BEAUCHAMP, and EARL L. MUETTERTIES. Complexity of Chemical Communication in Mammals: Urinary Components Mediating Sex Discrimination by Male Guinea Pigs	264
THOMAS P. NIGRA, GEORGE R. MARTIN, and HARRY EAGLE. The Effect of Environmental pH on Collagen Synthesis by Cultured Cells	272
J. F. KOSTER, J. FERNANDES, R. G. SLEE, TH. J. C. van BERKEL, and W. C. HÜLSMANN. Hepatic Phosphorylase Deficiency: A Biochemical Study	282
H. LINTON WRAY and ALBIN W. HARRIS. Adenosine 3',5'-Monophosphate-Dependent Protein Kinase in Adipose Tissue: Inhibition by Tolbutamide	291
KAZUSHI TANABE and TAIJO TAKAHASHI. Conversion of DNA Polymerase Extracted from Rat Ascites Hepatoma Cells	295
G. V. MARINETTI, R. BAUMGARTEN, D. SHEELEY, and S. GORDESKY. Cross-Linking of Phospholipids to Proteins in the Erythrocyte Membrane	302
B. I. SINZINIS, G. B. SMIRNOV, and A. A. SAENKO. Repair Deficiency in <i>Escherichia coli</i> UV-Sensitive Mutator Strain <i>uvr502</i>	309
N. MARQUES, L. WANG, M. MYIASHITA, A. M. S. STOLF, J. BALSAMO, and R. BRENTANI. Reiteration of DNA Complementary to a Cytoplasmic Nonribosomal RNA	317
DAVID F. WILSON, CHARLES OWEN, LEENA MELA, and LOUIS WEINER. Control of Mitochondrial Respiration by the Phosphate Potential	326
SURIENDER KUMAR. Fatty Acid Synthetase Complex. Selective Inactivation by Phenylmethylsulphonyl Fluoride	334
MASAO ONO and MOTOO HOZUMI. Effect of Cytochalasin B on Lymphocyte Stimulation Induced by Concanavalin A or Periodate	342
FRED SNYDER, MARGARET CLARK, and CLAUDE PIANTADOSI. Biosynthesis of Alkyl Lipids: Displacement of the Acyl Moiety of Acylidihydroxyacetone Phosphate with Fatty Alcohol Analogs	350
STEPHEN N. SHAW and HAROLD AMOS. Insulin Stimulation of Glucose Entry in Chick Fibroblasts and HeLa Cells	357
ERRATA	366

P. DAVIES and K. GRIFFITHS. Stimulation *in Vitro* of Prostatic Ribonucleic Acid Polymerase by 5 α -Dihydrotestosterone-Receptor Complexes 373

JOSEPH BIETH and CAMILLE G. WERMUTH. The Action of Elastase on *p*-Nitroanilide Substrates 383

MASAKI SAITO and JULIAN KANFER. Solubilization and Properties of a Membrane-Bound Enzyme from Rat Brain Catalyzing a Base-Exchange Reaction 391

AUTHOR INDEX, VOLUME 53	1357

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5×11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation.

Manuscripts should be double-spaced on one side of the sheet; **references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the Commission on Biochemical Nomenclature Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be created in accordance with the rules of the NAS-NRC Office of Biochemical Nomenclature and **must be defined in a footnote**, rather than in the text. Such abbreviations **must not** be used in the Summary. The improper use of abbreviations may necessitate the return of manuscripts for retyping, thereby delaying publication.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use of the Enzyme Commission ("EC") code number is recommended.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol for the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the *Archives of Biochemistry and Biophysics* (1973) **154**, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be done with a mechanical lettering set (e.g., Leroy; lettering size 120 or 140) and black ink. Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 × 8 in.) ; the original drawings must be planned accordingly.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1969. Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* 142, 363-370.

For a book by one or more authors:

2. Robison, G. A., Sutherland, E. W., and Butcher, E. (1971) *Cyclic AMP*, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms are sent to the authors immediately upon acceptance of their manuscript. The price list is included.
